DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the second source includes a read only memory cartridge, an Internet site, and a second hand-held electronic toy (device) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, 4, 8-11, 13, and 17-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Berman '773.

4. Berman discloses a display (figure 2), a toolbar menu (figure 2) enabling a selection from a plurality of interactive tools that are included on the toolbar menu, an interactive tool (12) enable interaction with an activity that is displayed on the hand-held device, one or more of the plurality of interactive tools on the toolbar menu is based upon an identity of an activity that is displayed on the hand-held device as recited in claims 1 and 10; a memory for storing the

Art Unit: 3714

activity displayed on the hand-held device as recited in claims 2 and 11; a removable memory cartridge (31) as recited in claims 3 and 11; a communication device for receiving data from a second source (column 11, lines 27-37) as recited in claims 4 and 13; a stylus (12) that enable a user to interact with the display and the stylus allows the user to select the interactive tools and the activates displayed on the display as recited in claims 8-9 and 17-18; receiving a selection of one of a plurality of activities for display on the hand-held device and upon selecting of an interactive tool included within a toolbar menu on the hand-held device determining an interactive tool characteristic based upon an identity of the selected activity (summary, at least) as recited in claim 19; determining a state of availability for the interactive tool as recited in claim 20; determining contents of a second menu of tool options for the selected interactive tool as recited in claim 21; retrieving an activity application from memory for display on the hand-held device and determining a characteristic of an interactive tool included on a toolbar menu disposed on the hand-held device based upon an identity of retrieved activity application (summary, at least) as recited in claim 22; determining a state of availability for the interactive tool as recited in claim 23; determining contents of a second menu of tool options for the selected interactive tool as recited in claim 24; displaying a first selectable item on the hand-held device wherein the first selectable item being associated with an activity capable of being displayed on the hand-held device, displaying a second selectable item on the hand-held device wherein the second selectable item being associated with an interactive tool having a characteristic in a first state, and upon receipt of a selection of the first selectable item on the hand-held device determining whether to modify a state of the characteristic of the interactive tool from the first state to a second state (summary, at least) as recited in claim 26; the

Art Unit: 3714

characteristic is an availability and a menu of contents of the interactive tool as recited in claim 28.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3, 5-7, 12, and 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berman '773 in view of Kono '694.

7. Berman discloses the claimed invention as discussed above except for the memory being removable memory cartridge as recited in claims 3, 5, 12, and 14.

Kono teach a detachable memory cartridge (21A in figure 7 and column 8, lines 32-41). By having a removable memory cartridge, one having ordinary skill in the art would be able to provide a wide variety of applications. Therefore, it would have been obvious to one having ordinary skill in the art at the time of the applicant's invention was made to modify Berman to include a removable memory cartridge as taught by Kono. To do so would allow a user the capability for a wide variety of applications.

Regarding claims 6-7 and 15-16, the particular communication devices used is a matter of design choice, wherein no stated problem is solved, or unexpected result obtained, by using the specific communication devices claimed versus the communication devices taught by the prior art.

Art Unit: 3714

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

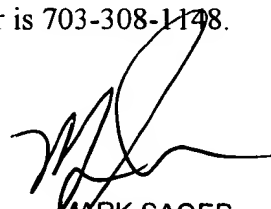

Capps `350, Ruberry `287, Scidensticker `012, Ohara `176, Bushmitch `762, and Dan `702 and `507 all discloses different types of personal digital assistants communicating with other devices.
